CERTIFICATIONS

Full Stack Web Developer Certification – Udemy | Link

- Built full-stack projects while learning modern frontend and backend development using the MERN stack.

PROJECTS

Online Blog Writing & Editing Platform   **March 2025 – April 2025**

Tech Used: React, TinyMCE, Appwrite | Live Demo

- Developed a full-stack blog platform with create, edit, and read functionality using React and Appwrite.
- Integrated TinyMCE for rich-text editing and implemented a theme toggle to enhance user experience.
- Implemented secure authentication flows with Appwrite, ensuring robust user management.
- Built an AI-powered search tool to improve content discovery and engagement.

Online Healthcare management system   **February 2025 – March 2025**

Tech Used: MERN Stack, Razorpay | Live Demo

- Collaborated on developing a healthcare platform with role-based dashboards for admins and doctors.
- Built React-based frontend dashboards for seamless user interaction and data management.
- Developed backend functionalities for appointment scheduling and managing patient records.
- Integrated Razorpay to enable secure and efficient online payment processing.

Tourism platform   **October 2024 – November 2024**

Tech used: MERN stack | Live Demo

- Built a tourism platform connecting users with guides, homestays, and experiences in Uttarakhand.
- Designed a fully responsive frontend with an intuitive UI, improving accessibility and user engagement.
- Implemented JWT authentication and basic booking features, streamlining the user login and booking process.
